Trip Overview

Climb the **Chulu West Peak** (6419 meters / 21,055ft) and make your dream of peak climbing in one of world's most beautiful regions (the Annapurna) come true.

There are two Chulu Peaks, East and West and this package is for the Chulu West Peak Climbing. Standing at a height of 6419 meters, the Chulu West Peak offers itself as an interesting peak climbing opportunity for those looking for an adventure in the [Annapurna Region](#).

There is considerable confusion about the name and location of the Chulu peaks and what summit actually constitutes Chulu West and Chulu East, as it soon becomes obvious to anyone who has climbed in the range that several other nearby summits, which are actually part of the Chulu massif, are not shown on present maps of the area.

Some consider the Chulu West peak is one of the best peaks in the Annapurna region. While climbing, you will also be able to enjoy magnificent views of Dhaulagiri, Nilgiri, [Annapurna](#), among other Himalaya peaks. However, climbing the Chulu West Peak requires a good physical condition and a high degree of stamina.

Chulu West Climbing Route and Trail Conditions

After initial preparations and sightseeing in Kathmandu, we drive to Khudi from where we begin our trek. The trail leads slowly to the Manang Valley, one of the highest valleys of the world.

We set up two camps above the base camp. After summiting the Chulu West, we return via the [Thorong-La](#) Pass and [Muktinath](#) to Jomsom. From Jomsom, flight / drive to Pokhara and drive back to Kathmandu.

In a small valley to the north, the obvious approach to this peak diverges from the main trail to the [Thorong La Pass](#) past Manang village and Base Camp. The route follows a subsidiary North-West ridge from the base camp, which leads to the main peak.

An attempt at the peak and return has been made in one day as it is not easy to set up camp on the slope above the base camp.
