Trip Overview

Gokyo Lakes, Everest Base Camp and Island Peak Climbing is a wonderful experience in Nepal. This trip of a lifetime is designed for all kinds of trekkers, both serious and amateur. It has a snow-capped and an impressive west face. The beauty and thrill attract many trekkers to the Island Peak.

The journey is following the classic [Everest Base Camp trek](#). You'll be heading northeast through the Khumbu Valley experiencing the Sherpas culture and hospitality. At Phakding, Namche, Dingboche, Tengboche and Lobuche the tea houses will welcome you for a comfortable stay.

Visiting the [Everest base camp](#), you'll also be climbing the Kala Patthar, a famous nearby highest point. This summit provides a stunning view of the Everest, Nuptse, and Lhotse. From Dingboche, you will head towards the Island peak.

It's challenging to climb the Island Peak and you need to be prepared with equipment like crampons and ice axes. This trek is also popular and in high demand due to the challenging journey.

Atop the Island Peak, the mesmerizing breathtaking views of Ama Dablam, Lhotse and more are worth all the hard work. If you are determined to conquer this peak, some stamina training will be a plus point. Well, the descent can be enjoyable. You will descend via Chhukung, Dingboche, Tengboche and Namche

Bazaar before you arriving Lukla via Phakding. The descending is quite quick.

The pathway to the [Everest Base Camp](#) passes through a number of Sherpa villages that will give you a good glimpse of local Sherpa culture and its hospitality. The guest houses are absolutely comfortable at such altitudes.

It's not to be missed the flora and fauna. The biodiversity is unique and you can see nature in its true form.

Trip Difficulty Level

Gokyo Lakes, Everest Base Camp and Island Peak Climbing is a challenging, but if you're in good physical condition we'll get you to the peak. If you've been trekking to altitude before, that's a great next goal.

The first part of the climb is very physically challenging because you are trekking up rough terrain at more than 5000 m. This part is definitely non-technical though. You'll have to wear crampons and rope-up when you enter the glacier zone.

During this section there is a risk of falling into snow-capped crevasses. These ladders will be strapped to get across. This can be challenging but you will be on safety lines at all times. You finally reach the foot of the headwall.

This is the hard part of the climb as the climb is very steep, and the air is very thin. Fixed lines make the climbing route safe but it will take a great deal of determination to get to the summit ridge. A short, fairly easy ascent from the summit ridge to the top.

How Much Does it Cost to Do This Trip?

An experienced and reliable local tour operator will likely charge from USD 3000 to USD 3500 for an all-inclusive package.

What's the Best Time of the Year to Do This Trip?

You can go trekking to the [Everest region](#) at any time between September and the end of May. Considering the height of Island Peak and the challenging conditions, we work with much smaller windows of opportunity.

Bad weather on base camp walk might be inconvenient, but on Island Peak it might be really dangerous. To safely climb [Island Peak](#), we only go on trips from mid-September through [November](#), and from March through [May](#). The temperatures are good during these times and the most of the days are warm and sunny.

Most interestingly, during these times the strong winds that follow the monsoon die down, and there are long periods of relative calm ideal for climbing.
