Kilimanjaro Trip - Lemosho Route Overview

The Lemosho route is one of the best options for climbing Kilimanjaro. The route gives you plenty of time to acclimatize and takes in the entire mountain scenery as it traverses it from west to east.

The western route requires a bit longer drive to the trailhead but is well worth it because you get to drive through some wild area and may even spot a buffalo or an elephant.

During the first few days of the trip, you will ascend the western flank of the mountain, a side of the peak few visitors see, as you ascend through lowland jungles to the Shira Plateau. The remainder of the trek follows the classic Machame route, after reaching Shira Camp 2 on the third day, and the number of hikers on the trail increases.

The fourth day of trekking is helpful for acclimatization, as you ascend to the Lava Tower (4600m / 15,000 feet) before descending to the Barranco Valley campsite.

Another day of hiking brings you to Barafu's high camp, which is located on a barren volcanic plain. Climbers relax here in the afternoon before making the nighttime summit push. It takes 6 hours to reach the crater rim and another hour to cross the rim of the crater to reach Uhuru Peak, Africa's final summit and highest point.

When to Climb Kilimanjaro?

The best time to climb Kilimanjaro is between Mid-June and September, warm and sunny in the day with low rainfall. Trails are busier but it's migratory season for wildlife, so it's ideal for combining with a [safari](#).

However, [Kilimanjaro](#) can be climbed all year; even the short rainy seasons (March through May, and

November and December) don't stop hiking, and small rains can be enjoyable on the trail. Another popular time is from January through early March.

It's still chilly in the evenings and mornings (Uhuru Peak's weather range from -7 to -29°C at night), but that's the case whenever time of year you go.

Itinerary

Day 01: Arrive in Kilimanjaro Airport - Moshi.

Welcome to Kilimanjaro. One of our representatives will pick you from Kilimanjaro International Airport and transfer to Moshi, the gateway to Kilimanjaro. Meet your guide and check your gears in the evening in preparation for the trek the following day.

Day 02: Mt Mkubwa Camp.

It takes about 3 to 4 hour's drive to Londorossi Gate, the beginning point for the climb. It's an amazing ride through some remote area, so keep your eye out for wildlife.

After a few hours of formalities with the park rangers at the gate, you'll be on the trail. The trail passes through lowland forests, where giant Colobus, monkeys which are common.

Trek Duration

3 - 4 hrs

Highest Altitude:

2900m

Day 03: Shira 2.

The first part of the day's hiking is fairly steep as you climb up out of the jungle and into the moorland ecosystem dominated by Giant Heathers and a variety of wildflowers.

You will first reach Shira Ridge before continuing gently downhill through the Shira Plateau to Shira 1 Camp for rest and lunch. We then cross the Shira Plateau to Shira 2 camp, where we can see the Western Breach if the sky is clear.

Today's long day allows us to acclimatize at the high camps with short day before our big summit day.

Trek Duration

7 - 8 hrs

Highest Altitude:

3875m

Day 04: Barranco Camp.

Leaving Shira 2 in the morning, you ascend towards Kibo, the western glaciers visible across the rugged high-altitude desert of volcanic rocks and boulders.

The trail ascends to Lava Tower (15000 feet / 4600m) before descending into Barranco Valley. The area before the campsite is known as the "Garden of the Senecios," and it has several large senecios as well as shorter lobelia plants.

It takes 7 to 8 hours to walk and the entire ascent is only 110m, but having climbed much higher and descended back down helps with acclimatization.

Trek Duration	Highest Altitude:
5 - 8 hrs	3983m

Day 05: Karanga Camp.

Today is a challenging climb up the steep Barranco wall (some scrambling but not technically hard), undoubtedly one of the trek's highlights.

You'll be able to take the breathtaking views at the summit before descending into the Karanga Valley, where we'll stop for lunch and spend the rest of the day acclimatizing and resting.

Trek Duration	Highest Altitude:
4 - 5 hrs	3983m

Day 06: Baraful High Camp.

Today we make our final push to Base Camp, and our longer early days are paying off.

Arriving at Barafu around lunchtime gives us to spend the rest of the day resting our legs and preparing for the big push to Africa's roof. After dinner, you'll return to your tents for some rest before we begin our ascent at midnight.

Trek Duration	Highest Altitude:
4 - 5 hrs	4645m

Day 07: Kilimanjaro Summit.

The day begins at midnight with the final push to the summit. The six-hour climb up a steep hill to the summit rim is cold and challenging. The trail is doable, but it is steep and has many switchbacks.

The summit rim is reached just before sunrise, and the climb around the rim to Kilimanjaro Peak, Africa's

ultimate summit and highest point. You'll return to Barafu Hut for a short rest and snacks before heading down to Mweka camp (3068m / 10,065feet).

One of the reasons for this long day of trekking is to avoid issues with high altitude and get you back down to a lower elevation quickly.

Trek Duration	Highest Altitude:
10 - 14 hrs	5895m

Day 08: Mweka Campsite to Moshi.

From campsite, it is about 4 to 5 hours descent through the forest to Mweka gate to collect certificates and meet the vehicle. Return to Moshi for the evening and a farewell dinner with your guides.

Trek Duration	Highest Altitude:
3 to 4 hrs	3068m

Day 09: Fly home.

After breakfast, according to your flight schedule we will drop you at the airport or assist you in catching the shuttle to Nairobi and trip concludes.

Price Includes

- Airport Pick-up and drop-off from Kilimanjaro Airport
- 2 nights of accommodation in Moshi, breakfast included (twin, B&B)

Useful Information

More Info - Good to know before you travel

How difficult is the Lemosho Route?

The Lemosho route is considered one of the easiest and best routes on Kilimanjaro because it's longer itinerary, which allows for better acclimatization.

Trekkers will still need to ascend the Barranco Walls and climb steeply on summit night. Although little technical climbing is required, a good level of fitness is strongly recommended.

What is the duration of the Lemosho Route and how long does it take?

The complete trekking distance for the Lemosho Route is 71km. The minimum number of days required for the Lemosho route is 7 days, however when arrival and departure days are included in, the total is nine. However, as it is a much longer approach route, it is best done over 8 or 9 days to increase your chances of success.

What is the scenery on the Lemosho Route like?

The Lemosho Route is considered as the most scenic of the routes. The journey takes trekkers from the West side of the mountain through lush forests before connecting the Lemosho Route to reach the magnificent Shira Plateau.

The route covers the mountain to the west and south, and the views are spectacular especially from the southern circuit.
