How Mount Everest Looks Like from Pikey Peak?

Amazing view from Pikey Peak

Above the beautiful and majestic Himalayan giants, the peak of Pikey (4065 meters) unveils Mount Everest as a proud jewel among them in an instant.

This is a viewpoint not yet well known to tourists but at which the most magnificent view of Everest can be obtained.

The View of Everest from Pikey Peak

Clearly visible if the day is fine, Mount Everest is high in the northern part of the sky and is not far from the center of the mountain range. The mountain is not as close as Kala Patthar or Gokyo Ri, but its top clearly stands out.

The black rocks of the mountain shine brightly under the golden sun, leaving a gorgeous contrast against the white snow. In the view, there will also be other mountains such as Lhotse, Makalu, and if the weather is good, Kanchenjunga in the far east.

A Peaceful Perspective

Pikey Peak definitely provides a 180-degree view that is much wider and unconventional from other vantage spots that are located near the mountain. The tranquility of the surroundings makes the experience of it even more intense.

The spot provides trekkers with an opportunity to view Everest in all its full glory as well as the reflection of the mountain's awe and peace in the surroundings.

Pikey Peak: Where Sir Edmund Hillary First Saw Everest

The first person to reach the summit of Mount Everest, Sir Edmund Hillary, caught sight of the highest mountain in the world for the first time at Pikey Peak. It was a historic moment in this place.

- One of his early expeditions in the Solu region brought Hillary to Pikey Peak, and there, he had a view of the whole Himalayan range.
- He later claimed that it was the most beautiful part of Everest in Nepal where he saw the best view of the Everest.

Far away from the common trekking routes, it is the most secluded piece of land with a different and beautiful view of Everest that captivates your impression of Hillary's exploit.

Now, tourists retrace Hillary's steps not only for the sake of it but also to be at the same spot, the same viewpoint, the Himalayan range and Mount Everest looking just as magical under the clear, bright blue sky with the golden sun rising.
